

POLIFLEX 2000

Characteristics	
Thermal class (temperature index)	H (180 °C)
Chemical composition	
Base resins	Polyesterimide
Overcoat	-
Bonding coat	-
Reference to the International Standards	IEC 60317-8 NEMA MW 30-C
UL – approval	File E 60641
Significant properties	<ul style="list-style-type: none">• Special winding wire with improved thermal, mechanical and chemical properties for the construction of motors and transformers
