# IRCE Group – **Highlights**

IRCE is a leading European Group operating in the industries of magnet wires and cables

IRCE Group Today	1 <sup>st</sup> H 2016	FY 2015	FY 2014	
Consolidated sales	153.8	349.9	350.6	(€/million)
Number of employees	752	740	768	(n.)
Magnet wires production	27,500	55,000	55,000	(tons)
Cables production	5,000	11,000	10,000	(tons)

### **History**

1947	IRCE began its activity in Imola (Italy) with the production of magnet wires
1947	The began to delivity in intola (italy) with the production of magnet whee
1961	The company launched the production of PVC insulated low voltage cables
1996	The Group was listed on the Italian Stock Exchange
1998	Acquisition of Smit Draad Nijmegen BV (The Netherlands)
2001	Acquisition of FD Sims Ltd (UK)
2001	The Group was listed on the Star Market Segment
2007	Construction of Brazil Plant
2007	Acquisition of Stable Magnet Wire P. Ltd (India)
2010	Acquisition of ISODRA GmbH (Germany)
2012	New sales office in Turkey
2015	Established the company in Poland

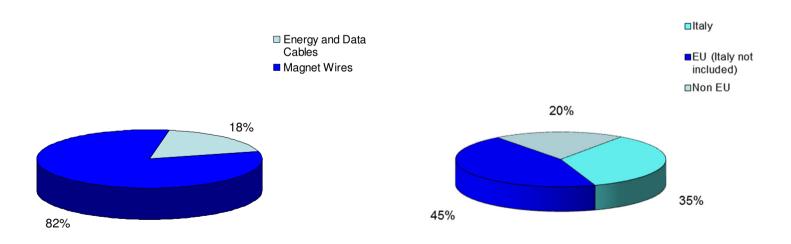

IRCE Group works in two business areas:

- Magnet wires
- Energy and data cables.

Today IRCE reference market is the European one, but the future target is to continue to enlarge its presence outside Europe, especially into the South American and Indian market.

### Sales breakdown by business areas

### Sales breakdown by geographical area

### **Magnet Wires**

Magnet wires, also known as winding wires or enamelled wires, have multiple applications such as electric motors, generators, transformers, compressors, inductors, relays, solenoid valves, etc. The wire is insulated through the application of many layers of enamels by means of highly sophisticated processes and machines, which demand high levels of investments and large scale of productions.

### **Energy and Data Cables**

Cables produced by the Group encompass the complete range of Low Voltage and Medium Voltage building and industrial cables, data cables (copper cables for LANs) and Power Cords with plugs. Cables can be insulated with PVC, rubber, polyethylene, etc. They are used for the construction of electricity plants in residential and industrial buildings and for the wiring and cabling of electrical appliances. The principal final industry sectors are the construction industry, housing and industrial applications, and consumer durables industries (vehicles, domestic appliances and other electrical appliances).

# > Magnet Wires

Magnet wires can be segmented pursuant to the raw material used, their shape, the wire gauge, and the characteristics of the insulating materials.

- Raw material: magnet wire can be distinguished between copper wires and aluminium wires.

Copper wires form the greater part of the market. Aluminium wires offer less

conductibility. They are, however used in products for which it is

important to minimise the weight.

- **Shape**: the wires may be round or rectangular.

**- Wire gauge**: pursuant to their gauge, magnet wires are classified into:

- ultra-fine (diameter < 0.05mm);

fine (0.05mm < diameter < 0.15mm);</li>medium (0.15mm < diameter < 2mm);</li>

- big (diameter > 2mm).

Fine and ultra fine wires finds their most frequent applications in the electronic sectors.

The medium size wires are mostly destined to the industries of White Goods,

Automotive, Lighting, Mechanical Tools, etc.

Big wires are mainly used by the industries of the transport and of the generation of

energy.

- Insulating materials: the main characteristics of these materials (polyurethanes, polyesterimide, polyimide) are

connected to the degree of their heat resistance that may vary from 130 to 220 degrees

centigrade.

Geographically the market is divided in major areas: Europe, South America, North America, Far East, etc; with limited trade among the areas.

# > Magnet Wires

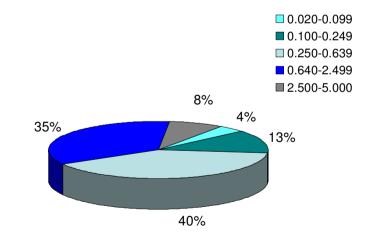

### > Market share

In the Magnet Wire business IRCE manufactures and sales the complete range of products, and is mainly engaged in the segments of the fine and medium wires. It mainly operates in Europe, where it is third by size.

### Sales breakdown by industry

# □ Electromechanical/Electronics □ White goods □ Automotive □ Lighting 15% 5% 40%

### Sales breakdown by size

# > Magnet Wires

# > Major customers by sectors

### **White Goods**

Whirlpool / Embraco

**BSH**

### **Electromechanical/Electronics**

Siemens

Schneider Electric

**Cummins Generator Technologies** 

Tyco Electronics

Somfy/Sitem

Panasonic

Finder

### **Lighting**

Osram

Vossloh Schwabe

# > Energy and Data Cables

The group produces the full range of low and medium voltage cables, data cables and cords with plugs.

Cable customers are divided into two main sectors:

### **Distributors of electrical material**

Com-Cavi Spa Sonepar Deutschland Cable Gmbh Gefi Srl Dieter Eifler Gmbh Tkd Kabel Gmbh

### **Industrial sector (white goods)**

Whirlpool Group BSH Group Electrolux Group Unionalpha Spa (Indesit Group supplier) Bata Srl (Indesit Group supplier) Selectra Srl
